

DR. RUTH BENEDICT

SHE / HER

AMERICA'S FIRST FEMALE
ANTHROPOLOGIST, A HEARING-
IMPAIRED RESEARCHER

Benedict's idea that a "culture" is not a random collection of traits, but a unique organization of these traits, has been a major contribution to the world's understanding of cultural diversity, personality, and human behaviour. She also refuted current theories of racial superiority.

**"The purpose of Anthropology is to make the world
safe for human difference."**
